Tetralogy of Fallot

Malformation first described by Niels Stensen in 1671

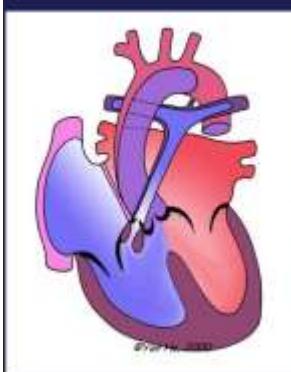

Etienne-Louis Arthur Fallot

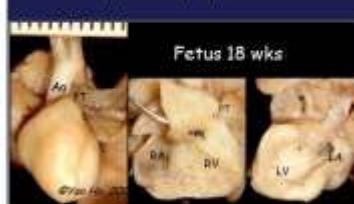

1888

Contribution à l'anatomie pathologique
de la maladie bleue (cyanose cardiaque)

Tetralogy of Fallot

- Ventricular septal defect
- Overriding aorta
- Subpulmonary stenosis
- RV hypertrophy

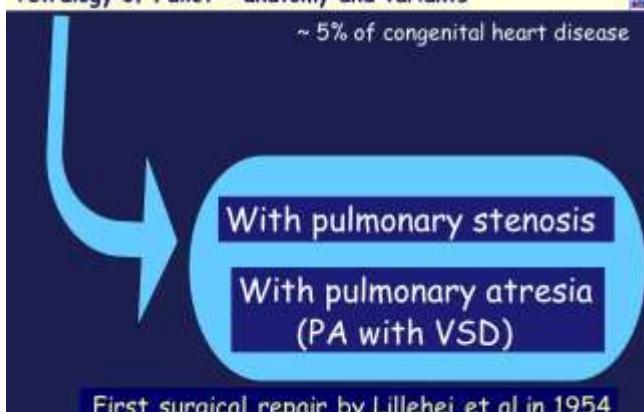

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS Foundation Trust

Tetralogy of Fallot – anatomy and variants

~ 5% of congenital heart disease

First surgical repair by Lillehei et al in 1954

Morphology: Tetralogy of Fallot with PS

- Antero-cephalad deviation of OS
- Hypertrophy of SPT

www.rbht.nhs.uk/morphology

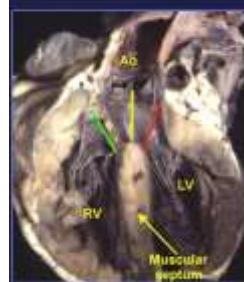

Royal Brompton & Harefield NHS Foundation Trust

Basic malformation +

Variable morphologic features

- Extent of aortic override
- Right ventricular margins of VSD
- Nature of sub-pulmonary obstruction
- Pulmonary valve malformation
- Associated malformations

Overriding aorta

Variability in Aortic Override

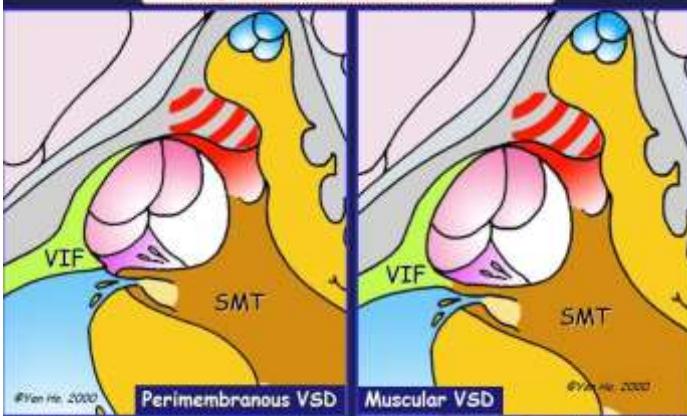

Variability in Ventriculo-arterial connections

- Aorta predominantly supported by LV (effectively concordant connections)
- Aorta predominantly supported by RV (effectively double outlet connection)

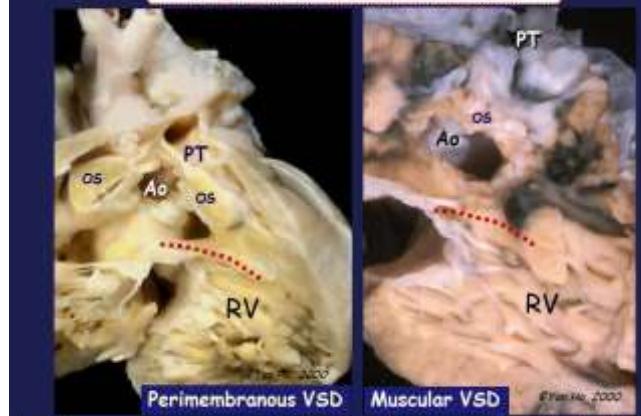

- at mouth of infundibulum } stenotic
- pulmonary valve } to atretic
- within body of right ventricle
- distally within pulmonary arteries

VSD and AV conduction bundle

VSD and AV conduction bundle

Morphology: Tetralogy of Fallot with PS

Associated malformations

- Pulmonary atresia ← Later
- "Absent" leaflets of pulmonary valve
- Straddling tricuspid valve
- Atrioventricular septal defect
- Coronary arterial anomalies
- Right aortic arch
- Muscular inlet VSD
- Arterial wall

Tetralogy of Fallot: absent pulmonary valve

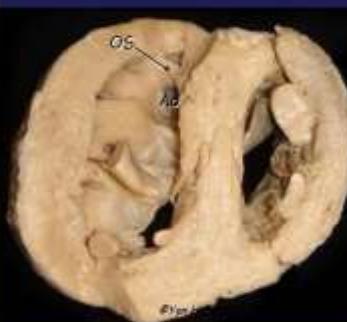

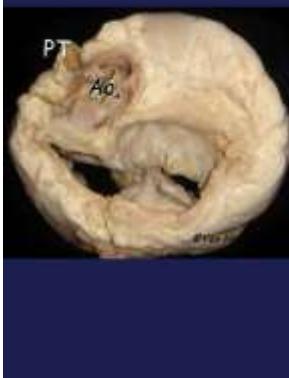

Imperial College

Tetralogy of Fallot: Aortic root

Tan JL et al,
Circulation 2005

(Yellow = A Root, Green = Asc Aorta, Orange = Desc Thoracic aorta)

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS Trust

Tetralogy of Fallot: Pulmonary trunk

Histology changes grade ≥2

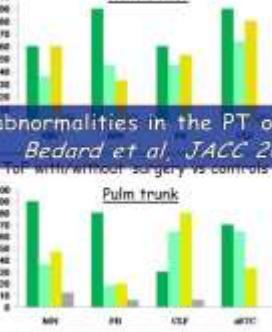

TOF vs controls (including infants)

Aortic root

TOF with/without surgery vs controls

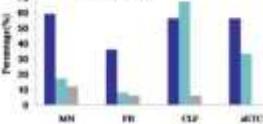

Aortic root

Marked intrinsic histological abnormalities in the PT of Tetralogy compared to controls. Bedard et al, JACC 2009

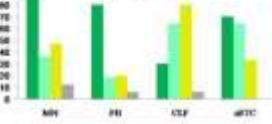

TOF vs controls (including infants)

Pulm trunk

TOF with/without surgery vs controls

Pulm trunk

Tetralogy of Fallot: anatomy and variants

- Pulmonary atresia ←
- "Absent" leaflets of pulmonary valve
- Straddling tricuspid valve
- Atrioventricular septal defect
- Coronary arterial anomalies
- Right aortic arch
- Muscular inlet VSD
- Arterial wall

Morphology@rbht.nhs.uk

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS Trust

Tetralogy of Fallot: with pulmonary atresia

- RV outlet to aorta via VSD
- Nature of atretic outlet (muscular/imperforate membrane)
- Type of VSD (perimembranous/muscular/multiple)
- Other intracardiac defects
- What supplies the lungs ?

Aortic override

Concordant ↔ DORV

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS

Nature of atretic outlet

- Well formed outlet septum Deviated
- Imperforate pulmonary valve
- Muscular atresia

Example of muscular atresia

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS

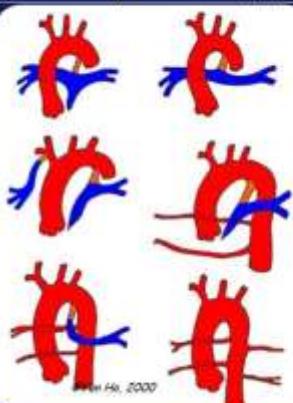

- RV outlet to aorta via VSD
- Nature of atretic outlet
- Type of VSD
- Other intracardiac defects
- What supplies the lungs ?

Source of pulmonary blood supply

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS

pulmonary blood supply ?

Variations

- Duct: unilateral or bilateral
- Systemic-to-pulmonary collateral arteries
- Others, e.g.:
 - Aorto-pulmonary window
 - Fifth aortic arch
 - Coronary-pulmonary fistula

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield NHS

Tetralogy of Fallot: with pulmonary atresia

pulmonary blood supply ?

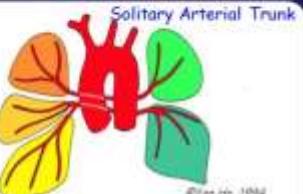

Variations

SUPPLY VIA ARTERIAL DUCT

RIGHT UPPER LOBE VIA COLLATERAL ARTERY
OTHER LOBES VIA CENTRAL PULMONARY ARTERIES
- FED VIA THREE COLLATERAL ARTERIES

EXCLUSIVE SUPPLY VIA COLLATERAL ARTERIES
ANOMALIES OF ARBORIZATION
ABSENT CENTRAL PULMONARY ARTERIES

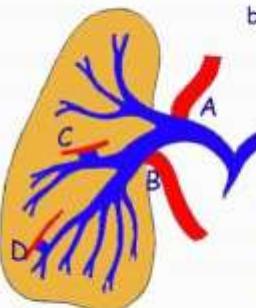

www.rbht.nhs.uk/morphology

Royal Brompton & Harefield

Tetralogy of Fallot: with pulmonary atresia

Anastomoses

between SPCA and central PAs
8/9 cases

Ho et al, 1992

Right Left

	Right	Left
A. Extrapulmonary	2	1
B. Hilar	0	1
C. Lobar	5	7
D. Segmental	6	1
	13	10
