

The Heart of the Matter

IJN has long had the expertise to deal with various vascular diseases, its treatment and procedures. With increasing knowledge, constantly advancing treatment options and innovative technology, we recently streamlined our focus in all things vascular to complement our core speciality of cardiovascular and thoracic medicine.

Our dedicated vascular centre was set up in 2021 with the goal to complete and treat the whole myriad of vascular disease.

It offers a full range of expertise to diagnose, treat and manage the diseases and problems of this all-important area of blood flow.

IJN Vascular Centre

The Facilities

Equipped with cutting-edge equipment, the *IJN Vascular Centre* has a dedicated advanced *Hybrid Operating Room*. This standard operating environment is enhanced by an image-guided interventional suite to allow for advanced surgical procedures and facilities to deal with the complex issues of delicate blood vessels.

The Expertise

We have a highly specialised and highly skilled team of clinicians comprising Vascular Surgeons, Cardiothoracic Surgeons and Cardiologists, supported by a competent and efficient allied health team.

They offer the best care and treatment for vascular diseases and problems, ranging from diagnostics to complex surgeries and compassionate post-surgical care.

Each patient is carefully assessed and diagnosed, with treatment and management protocols designed individually to best suit needs and requirements.

Besides long-practised open surgeries, our surgeons have the expertise to perform endovascular surgeries and procedures that are less invasive and have improved outcomes. Our key vascular surgeons bring with them extensive knowledge and training and well-honed skills to the table, ensuring that the most contemporary and current methods are implemented to offer the best options to patients.
